

30 Years of Seeing
Space Differently

SCIVIS 2020

Space Camp for Interested Visually Impaired Students
<http://www.scivis.org>

*“Just because you
can’t see the stars
doesn’t mean you
can’t reach for
them”*

—SCIVIS Alumni

Do you know a child that would benefit from an extra challenge in space science, robotics, aviation or math? Are you looking for a meaningful way to encourage braille reading? The use of low vision devices? Cane skills? Or, social skills? SCIVIS does just that! SCIVIS is a magical opportunity for students to integrate the functional use of skills in math, science and language arts with all of the areas of the Expanded Core Curriculum for the Visually Impaired. *Many students leave SCIVIS not just with more knowledge of space and science but also with more confidence in themselves!*

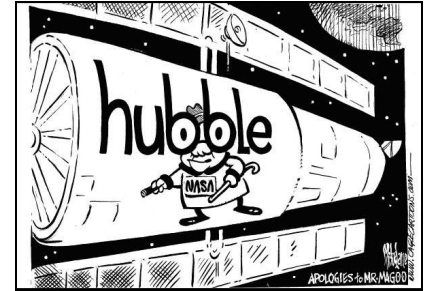

Space Camp for Interested Visually Impaired Students (SCIVIS) is held the last week in September at the U.S. Space and Rocket Center in Huntsville, AL. Over the past 30 years it has attracted students from dozens of countries and almost every state. In 2019, 182 students from 24 states and 12 countries participated.

Limited financial support is available through grants, local and state agencies and national organizations. For more information about scholarships, accommodations and registration, please contact:

Dan Oates, 190 Armstrong St. Romney, WV 26757
scivis@atlanticbb.net. Cell: (304) 851-5680.

DATES: The last week of September 2020, (exact dates to be announced)

Space Camp for the Deaf & Hard of Hearing is coordinated by Amy Newland,
deafspacecamp@aol.com, mobile 412-999-4767.

**SCIVIS is:
“The Ultimate
Hands-on
Experience”**

“For humans, touch can connect you to an object in a very personal way, make it seem more real.”

Jean-Luc Picard, Captain, U. S. S. Enterprise, Paramount release, First Contact

Come Spend a Week in Space!!
